

**For Immediate Release:**

# NIKOLA TESLA Energy Independence Celebrations 2010

**Philadelphia, PA • July 9-10-11**

## **Tesla Science Foundation Brings Together Scientists, Inventors And Enthusiasts For A Three-Day Conference Highlighting The Need For A New Energy Paradigm**

This July in Philadelphia, the **Tesla Science Foundation** will be hosting a three-day conference and celebration to commemorate Nikola Tesla's legacy and world vision. Tesla was a brilliant inventor who lived during the turn of the 20th century. His innovations resulted in the implementation of alternating current, the AC motor, wireless technology, and many other influential inventions that we now take for granted in the modern age. Tesla's vision to bring clean, free energy to the world through advanced wireless technologies was blocked by the financial and corporate interests of his time. Through this event, the **Tesla Science Foundation** will bring together like-minded scientists, inventors and enthusiasts who share the common goal of bringing Tesla's advanced energy technologies to fruition for the betterment of humanity.

### **Schedule Of Events:**

July 9th, 8 pm - 2 am:

Tesla Birthday Bash, Independence Visitors Center, 6th & Market Streets

July 10th, 10 am - 8 pm:
